

1.0 inch Prism Corner use

MG-1000SP

Target Probe: Detachable

MG-1000SPT

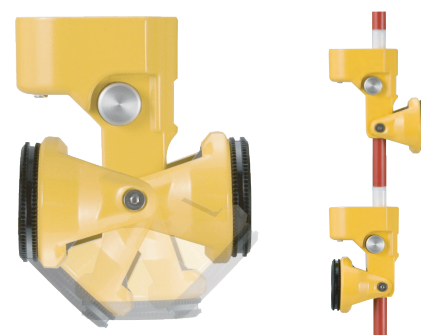

Target Probe: Fixture

MG-1000SPT

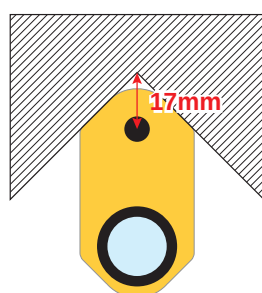

MG-1000SP

*Pole is option

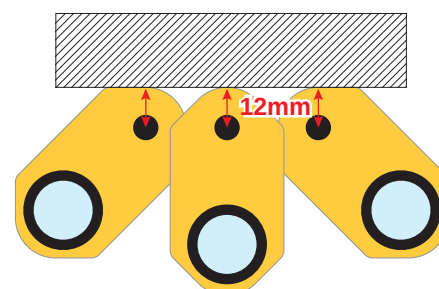

180 degree movable

at Corner

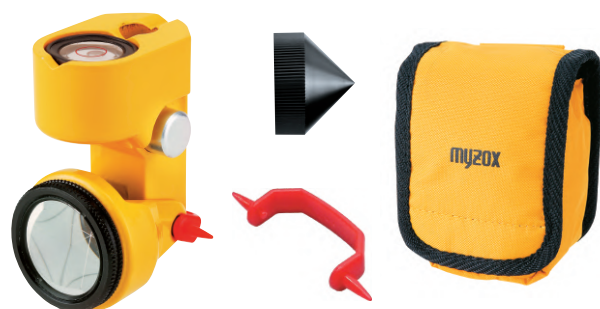

This is good for surveying on the corner of 90 degree.
The offset from the corner is fixed; 17mm.
With MG-1000SP, there is very few measuring error.

against Wall

When setting the prism against wall,
unless the prism face parallel to Total Station rightly,
there can be some error. But the prism constant of
MG-1000SP is not changed in some angle.
